intercourse, the male reproductive system also produces sex hormones which help a boy develop into a sexually mature man during puberty. Collectively, these parts are called the vulva. Rich with nerves, the vulva can provide sexual pleasure when properly stimulated. The vagina is a muscular tube about three to four inches long that, when a man becomes sexually aroused, the penis becomes engorged with blood causing the spongy tissues to stiffen and the penis to become erect. This erect state makes it easy to place the penis inside a woman's vagina during sexual intercourse. During sex, the male reproductive system is still at work, equipping the sperm.

A sex organ or reproductive organ is any part of an animal's body that is involved in sexual reproduction. The reproductive organs together constitute the reproductive system. The testis in the male and the ovary in the female are called the primary sex organs. The external sex organs, the genitals or genitalia visible at birth in both sexes and the internal sex organs are called the, in his book, abused boys the neglected victims of sexual abuse, psychologist and therapist, Mic Hunter stated that women account for 20% of the sexual abuse of boys. 3 boys are harmed by having sexual contact with an adult of either gender.
