Also called rail and stile, it is a woodworking technique often used in the making of doors, wainscoting, and other decorative features for cabinets, furniture, and homes. The basic idea is to capture a floating panel within a sturdy frame as opposed to techniques used in making a slab solid wood cabinet door or drawer front. The door is constructed of several cut a shelf and door cut one adjustable shelf to size from 3/4 plywood as shown in the cutting diagram. Note that the shelf is slightly shorter and narrower than the top, bottom, and divider. That makes it easy to fit the shelf into the cabinet and adjust it as needed. You can also cut the door to size now. We regularly receive homeowner questions from Taylorcraft Cabinet Door Company's Houzz page asking where to place knobs and pulls on cabinet doors. Providing homeowners with a visual of cabinet door hardware placement can position your cabinet shop as a source of knowledge and help prevent misunderstandings, for example, if the door opening in the cabinet face frame is 12 by 18 inches, the size for a full overlay door would be 13 1/2 by 19 1/2 inches. This type of door is typically used on more, inset door face frame cabinetry.
A special and unconventional category of framed cabinets is represented by those with inset doors. An inset-mounted cabinet door is fitted to the frame in the same way as a typical room door is fitted to the doorway. Such doors fit into a frame when closed.
