Overview

What is arthritis? Pain

Pain is your body's alarm system. Pain tells you something is wrong when part of your body is injured or damaged. Nerves in that area release chemical signals. Other nerves act like tiny telephone wires and send these signals to your brain, where they are recognized as pain. Pain tells you that you need to do something.

The Arthritis Foundation Wisconsin Chapter would like to extend a special thank you to our volunteers, participants, and staff who helped make the Jingle Bell Run in Racine possible. We had an excellent turnout on a chilly December day.
