Boeing Matrix Organizational Structure

Boeing generalizes the divisions of their organization into six areas that they manufacture products out of. They then use matrix structure to assign responsibilities to individuals working with a senior vice president as the head of the department. Organisational structure of Boeing discusses organisational structure of Boeing within the human resources management forums. Part of the publish upload project or download reference project category, organisational structure of Boeing is a major aerospace and defense corporation. Founded in 1916 by William Boeing, the Boeing company is a major aerospace and defense corporation. The Boeing company is an organization that has a standard corporate structure with 14 board of directors that oversee the current president and CEO, Dennis Muilenburg, but are most efficiently produced within a matrix structure with overlapping departments such as HR and legal. An example of a matrix organization is one that has two different products controlled by their own teams. Matrix organizations group teams in the organization by both department and product allowing for ideas to be exchanged between various members. Matrix structure Boeing uses the matrix structure to run its organization. Different divisions run independently due to the diversity of Boeing's products. Boeing is an organization that has constant changes in technology which means that collaboration amongst the divisions is essential for success. The obvious organizational solution to strategies that required multiple simultaneous management capabilities was the matrix structure that became so fashionable in the late 1970s and the early 1980s. The matrix management structure is also advantageous to the Boeing company since they are continuously filling out long-term contracts for various airlines around the globe and is in need of several functional organized departments. Boeing strengthens engineering function with new structure. Key appointments Boeing's reputation for engineering excellence is built on an array of outstanding products designed and developed under the guidance of strong engineering leaders said John Tracy, Boeing Chief Technology Officer and Senior Vice President of Engineering.
