California Fire Pump Weekly Testing Certification Questions

Information on this form covers the minimum requirements of NFPA 25 1998 for centrifugal fire pumps. Use of this form does not relieve the owner of the responsibility to comply with other requirements of NFPA 25 1998 for the NC fire apparatus driver operator certification. In a continued effort to reduce fire loss in the state of North Carolina, the State Legislature established General Statute 58-78-5.14b which requires the State Fire and Rescue Commission to establish voluntary minimum professional qualifications for all levels of fire and rescue service personnel. Pass a written test conducted by the State Fire Marshal. Note: Pressure maintenance jockey pumps are considered part of the fire pump system and shall be inspected, tested, and maintained in conjunction with the fire pump testing. Fire pump testing certification is invalid without the Type 1 license. Contact Life Safety Services at 949 644.

Post navigation: Fire pump testing, part II - Hose valve manifold vs flow meter. Preventing workplace fire hazards, inspection, and testing requirements for fire sprinkler systems. Sprinkler systems - Monthly, Quarterly, Semi Annual, Annual, Other code.

NFPA 25 inspection gauges: Dry preaction and deluge 2 2 4 2. Gauges on dry preaction and deluge systems shall be inspected weekly to ensure that normal air and water pressures are being maintained. Gauges on wet pipe, fire pump testing and maintenance checklist. Ask an FM Global engineer to take these steps:

1. Fill out the essential information on this form.
2. Mark the correct settings.
3. Provide flow test results.

An FM Global engineer also can provide the characteristic curve for the annual flow test. FM Global form 105 - Pump acceptance test data.

Weekly tests, an operational test must be completed once the fire damper is installed. Each fire damper must be tested and inspected one year after the installation. After you hit the one year mark, your fire dampers must be tested and inspected every four years except for hospitals which have a six year frequency.

Form for inspection testing and maintenance of fire pumps diesel information on this form covers the minimum requirements of NFPA 25 1998 for centrifugal fire pumps. This form does not relieve the owner of the responsibility of complying with the other requirements of NFPA 25 1998 for the inspection testing and maintenance of fire pumps.
