ATA chapter 26:

- Fire

ATA chapters:

- Chapter 05 05 00 00: Periodic inspections
- Chapter 06: Dimensions and areas

Those charts, diagrams, and text which show the area dimensions, stations, access doors, zoning, and physical locations of the major structural members of the aircraft include an explanation. The program for the 747 100 200 300 is because the 747 classic and 747 400 are structurally similar. Boeing and the industry decided to update the maintenance program for the 747 400 at the same time. The revised maintenance requirements comply with industry-wide maintenance practices developed by the Air Transport Association (ATA). Zoning of large aircraft is specified by the Air Transport Association of America in the ATA 100 specification. A zone is identified by one of three indicators depending upon whether it is a major zone, major sub-zone, or simply a zone:

- Air Transport Association (ATA) 100 system
- ATA 100 systems classification
- The more advanced forum for those who want to dig deeper into technical issues as well as airline management and operations.

Effective above date:

- The Boeing 787 Master Minimum Equipment List has been revised. The changes in this revision were made to align with FAA policy letters and to increase dispatch flexibility. All changes are reflected in the highlights of change listed below and are indicated by revision bars in the associated ATA section.

ATA chapters for the Boeing 787:

- Chapter 12 page 3
- Extra Flugzeugbau GmbH Service Manual Extra 200 page date 1 July 1996 12 00 00

This chapter describes the procedures and precautions necessary for proper servicing of the Extra 200. The specified intervals refer to chapter 05. The specified intervals are considered adequate to meet average requirements under normal operating conditions. ATA does not guarantee promise or warrant that the specifications in this document will meet the needs of your operations. This is a determination that you must make and for which ATA is not responsible.

Request your free quote for aircraft ATA chapter information along with part number, manufacturer, and description list all 6. Get detailed information of aircraft ATA chapters, according to Boeing data collected from operators.
