mercedes, convertible top trouble shooting the first four pages are a reprint of an article by richard holloway printed some 20 years ago but still applicable for our use today the information includes personal photos of a 63 thunderbird additional information includes information taken from the convertible top maintenance diagnosis, answer yes first check fuse 20 for the radio and see if that fuse has blown replacing it if it has blown then check if the radio works if ok then check the wipers if the fuse blows its probably the wiper motor burnt out from the wipers being turned on when the wipers were frozen to the screen or the wiring to the wipers being faulty damaged or damaged faulty wiring and it often, all grounds and rca's good it only started after the addition of the eq the eq is something i am experimenting with but i like the sound improvement and ease of adjustment for different kinds of music i have found forums that say the only thing you can do is add a shut off delay circuit on the remote lead going to the eq, after a battery reset i would advise the following additional procedure after body repairs to my car some years ago the bodyshop did not apply this to my car result being gearbox fault limp mode no dsc jaguar cars specify in their pdi instructions to dealers that when connecting the new battery the following procedure must be carried out ignition switched to on position engine not running, mazda mx 5 miata starting and stalling problems but sounds like a blender or a sewing machine someone told me it was the timing belt but they wee just guessing some body please help my baby is sick 0 hey paul i need to replace my convertible top on my 2002 miata and i was wondering if you had any suggestions i will probably, convertible top pump cylinder and hose installation instructions how it works most modern cars use an electric motor to turn a hydraulic pump which supplies pressure to the lift cylinders located on each side of the car the pump is usually located in the trunk area of the car and will most likely be held in place by 3 or 4 pointed grommets which push into holes in a bracket the rubber, important note a common mistake is to confuse an xj40 or x300 with an original xj not surprising since all of these cars were sold with an xj6 badge on them the series iii was originally intended as a stop gap model something to keep the wolves from the door while the replacement for the original then 10 year old design was designed and built, from nose to tail the xt5's styling is pure cadillac sharing the same edgy design theme and 3.6 liter v 6 with the brand's sedan lineup and more than a few design elements with caddy's full size, welcome to amd's official site revolutionize your gaming experience with latest graphics processors software technologies and drivers visit now and explore, share your car repair and maintenance
