pressure above 25 lbs or so the pressure pump is only to make sure the injection pump is full for its next shot
of fuel as you can t compress a liquid into a smaller state once the pump is full it s full now if you were going
to run fuel system at 4 or 5000 rpm an increase in pressure may be needed to keep pumps full but if you are
going to do that i want to, key benefits of john deere remanufactured fuel injection components reduces
customer downtime by providing an exchange fuel injection pump provides a cost competitive product
compared to outside fuel pump rebuilding options savings of 25 30 compared to a new component provides
