Bolt Action Soviet Union

to the end of the war in Europe with the surrender of Germany, the Soviet Union had the largest army in the world at the beginning of the Great Patriotic War. The Soviet army used weight of numbers to overpower the enemy, tirelessly throwing wave after wave at the enemy. From what is known as the Great Patriotic War, the Soviet Union and Germany engaged in a series of battles. In 1939, the Soviet Union signed a non-aggression pact with Germany, and the two countries proceeded to bring much of Eastern Europe under their control. However, when German forces invaded Russia in June 1941, the pact was shattered, and the Soviet Union declared war against Germany.

During the 100-day siege of Stalingrad, which started in 1942 and ended in 1943, the Soviet Union faced intense urban warfare. The Soviet Army, using the Zis-3 divisional gun, played a crucial role in the battle. The 76mm Zis-3 divisional gun was the backbone in many ways of the Soviet Union's force, allowing it to maintain control over the battlefield. The detailed army lists provided in this supplement allow players to construct Soviet armies for any theatre and any year of the war. This book provides bolt action players with all of the information they need to field the military forces of the Soviet Union from the bitter urban warfare of Stalingrad through the winter war against Finland and the final drive to Berlin.
